

# Truth On Earth

## Original Songs by Socially Conscious Teen Group

Dear Friends of Truth On Earth and Fellow Spiritual Travelers:

We have created our music for your pure enjoyment and expanded consciousness in the hopes that you will work with us to build a better world. The theme of Truth On Earth is to bring solutions to global problems through truth and non-violent protest and we base this mission on the life work of the greatest spiritual traveler in the history of our planet – Gandhi. He said “I object to violence because when it appears to do good, the good is only temporary; the evil it does is permanent.”

Our songs, and the efforts we make to record and perform them, are dedicated to all of the sufferers on this planet. Together, we will succeed in solving the problems that caused them. From our music, we donate 70% of our profits to a variety of organizations that address these problems in ways we feel are highly productive and working towards practical solutions. On this CD, our first release, we are focused on 854 million people that go to bed hungry every night. We are also focused on the 1 in 5 children that will be sexually abused each year of our collective lives by the very people that were entrusted to nurture and protect them. Our effort includes singing about the millions of people who are in a constant personal battle with substance abuse, and the 50 billion animals a year with no voice that are tortured and killed in slaughter houses.

We are also concerned about all participants and veterans of war who served valiantly when called upon but often did not get the proper support thereafter. Lastly, this project addresses the need to help victims of faceless cyber bullies who are fast growing in numbers and the crimes they commit. We are here to provide solutions, raise awareness, increase consciousness, and donate funds to bring the needed change to build a better planet. We believe in the universal communication power of music. We also believe that a small group of conscious people can change the world. So, this first release is provided to bring people together and assist in making the changes that will lead to a worthwhile future. To succeed we have to change.

We can no longer survive as a planet if we don't face these issues directly and do something. We need connectivity, enlightenment and clarity to end abuse, starvation, disease, violence and environmental problems, among others. We are asking you to join us and work towards the solutions. At times these heavy topics can be overwhelming but the Truth is what we sing about and in doing so we ask that you enjoy our music and join us in our efforts. There are enough of us out here to make it happen. We thank you for doing your part by supporting us and our music. Be inspired in knowing that in joining us you have begun, or added to, your participation in making the positive change that the world needs.

Peace and Love, Serena, Kiley & Tess
